Why Choose OneClick C&I?

Streamline C&I

OneClick C&I automates highly repeatable tasks such as updating software and firmware or checking alarms. OneClick C&I allows us to bring thousands of cell sites online quicker, more efficiently and less costly than traditional Commissioning and Integration.

Benefits of OneClick C&I

The OneClick C&I solution allows us to bring thousands of cell sites online quicker, more efficiently and less costly than traditional Commissioning and Integration. By updating C&I procedures, TeleWorld Solutions has cut the average person-hours per site from 3.55 hours to 0.73 hours, an increase in productivity of 437%.

TeleWorld Solutions Overview

Company Overview

- 500+ Employees
- Since 2002
- 3500+ Hours in-house training
- Integrated Systems and tools

Services Offered

TeleWorld Solutions

- Testing
- Optimization

People	Expertise	Tools	Automation	Data
• 500+ Employees • 2,500+ Alumni	• 3,500+ Hours In-house Training • 4-Year Tenure	• 100+ Certifications • Integrated Systems	• 5,000+ Algorithms • 1,000 Hours Efficiency	• 1 Billion+ Points/Day • Millions of Devices

TeleWorld Solutions is a subsidiary of Samsung Electronics America. Our mission is to leverage our various capabilities into solutions that solve problems and meet our clients' goals.

Task Automation
REST APIs
Exploits machine-to-machine communications using Representational State Transfer (REST) APIs to follow a strict set of rules that have been rigorously tested in the lab to automate these tasks.

Benefits of REST
By using REST APIs to automate these tasks for C&I, TeleWorld Solutions can test roughly 100 sites in parallel, and they can be scheduled to run during maintenance windows or business hours.
