

Tower & Communications Infrastructure Expertise

Planning

Each project begins with detailed execution planning and management timelines to meet customer expectations and budgets. Besides conducting planning meetings and site walks, we produce redline drawings to ensure accuracy.

Civil & Tower Construction

We provide and manage turnkey civil and tower construction services including antennas, support structures, and co-locations. Skilled in trenching, running conduit, pouring concrete pads, and other industry standard grounding practices, our tower crews also have high-level expertise in ground-related cabinet and H-frame installations.

Logistics & Material Management

With multiple warehouses located around the U.S., we are highly effective in material and inventory management. Plus, our fleet of trucks and trailers, along with tools, rigging and testing gear, allows us to quickly mobilize and dispatch equipment to project locations.

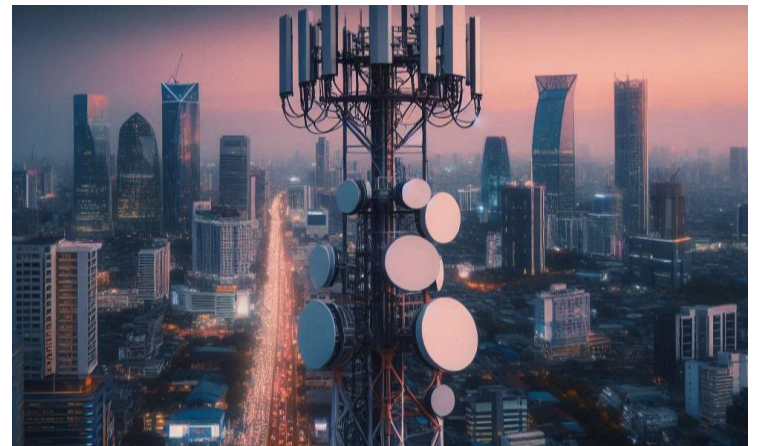

Installation & Testing

We have installed 6GHz to 16GHz microwave antennas, public safety DAS, and private networks in complex environments and rugged terrains. We also have deep experience testing these systems along with RF and fiber.

Cell Tower/Equipment Repair & Maintenance

We offer full-service preventative tower maintenance and emergency repair services for all types of towers and mounted equipment. Our maintenance team are experts at uncovering, troubleshooting, and developing action plans to resolve issues swiftly. From routine repairs to complex rebuilds, we ensure regulatory OSHA compliance on every project.

Safety, Training and Certifications

Our climbers are NATE-certified, and all technicians follow strict industry safety protocols and guidelines. To maintain their safety, construction, testing, and compliance certifications, our tower crew receives comprehensive industry training regularly.

TeleWorld Solutions

Connecting America with advanced telecom networks

TeleWorld Solutions' RF engineers quickly and cost effectively help operators and enterprises advance and future proof their telecom networks.

Industry Expertise

TeleWorld Solutions accelerates the full life cycle of wireless and wireline technology to provide cost-effective, customized solutions to MNOs, MSOs and OEMs, ensuring their networks meet current and future capacity needs

Engineering

Our engineering services are the core of everything we do. Our expertise spans all technologies and shared spectrum.

Deployment

TeleWorld Solutions has performed expedited services for several hundred thousand national small cells, DAS, indoor, and Wi-Fi deployments.

Custom Solutions for complex network challenges

We employ a range of innovative and proprietary technologies to deliver cost-effective network solutions.

Qualified Industry Staffing to meet resource demands

TeleWorld Solutions supports our enterprise and operator partners' needs with an industry-leading staff of qualified professionals.

Our staffing consists of project managers, field technicians, tower crews, network optimization engineers, performance engineers, and more. In addition, we have a network of 10,000+ TeleWorld Solutions trusted professionals and associates to fill large and small resource demands.

TeleWorld Solutions has the experience to advance and accelerate your network while saving you time and money, and helping you avoid costly mistakes.
