

## From Cabling to Commissioning, We Cover the Floor

TeleWorld Solutions deploys structured cabling crews, rack and stack technicians, and commissioning support into greenfield builds, colocation expansions, and refresh cycles. We work alongside GCs, EPCs, MEP firms, and system integrators, bringing the field execution and documentation discipline those environments demand.

### Data Center Services

#### Structured Cabling and Pathways

Fiber and copper installation, testing, and as-built documentation, executed to your specs and recorded so every team that follows has what they need.

#### Rack and Stack / Smart Hands

Installs, IMAC, equipment staging, and audit support, delivered to your standards and built to absorb scope changes without slipping your schedule.

#### Integration and Commissioning Support

MOP/MOS execution, punch list management, and full turnover package preparation, keeping your handoff timelines intact.

#### Field Technician & Engineering

Flexible, project-based staffing with certified technicians and engineers. Scalable resources deployed where and when your data center demands them.

#### Scalable Staffing Services

Two techs for a week or a dedicated crew for months, we staff to your project and scale as your workload shifts.
